Gold Winner Care Navigation

Portsmouth, N.H. – April 30, 2019

Validation Institute, an independent, objective, 3rd party organization focused on changing healthcare, hosted the second annual Health Value Awards Sunday evening at the Marriott Wardman Park Hotel in Washington, D.C. The ceremony recognized more than thirty companies and individuals leading innovative changes in healthcare.

RD Whitney, CEO of Validation Institute and the Master of Ceremonies for the event said “On behalf of Validation Institute and our 2019 Health Value Awards judges, it’s fair to say we were overwhelmed by the number of applications we received for this year’s award program. Tonight we celebrate all companies who have made it their mission to provide better health outcomes at lower cost.”

Health Value Award candidates complete a lengthy and rigorous application process, particularly those applying in a validated category. These companies undergo an in-depth evaluation to ensure the accuracy of their performance claims.

RD Whitney expressed that “Participating in the Health Value Awards shows these healthcare companies and providers are not only committed to providing high-quality, value-based healthcare, but are ready to lead the industry in this new, exciting, and necessary direction.”

About Validation Institute

The CI Validation Institute’s goal is to help organizations involved in population health – from

“

The Validation Institute, an independent, objective, 3rd party organization focused on changing healthcare, awarded US HealthCenter and its PredictiMed™ Population Health and Wellness Analytics, Predictive Modeling, Engagement and Care Navigation Solution with top honors in the category of “Care Navigation.”

Care Navigation is a sub-discipline of care coordination that aspires to steer patients to the most appropriate and effective clinical provider.

Health Plans to Employers to Vendors – adhere to the highest standards of validity, allowing them to compete on the basis of integrity and performance rather than hyperbole. Validation Institute will impartially challenge the status quo of typical population health outcomes measurement, with the objective of impacting how the industry establishes its credibility.
